PROFESSIONAL SUMMARY

Software developer with seven years building and shipping production applications across mobile, web and machine learning. Published apps on Google Play and the App Store, including fintech, public-health and e-commerce systems used by county governments and businesses in Kenya. Comfortable owning a product end to end: architecture, implementation, automated testing, CI/CD and store release.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, React Native

Web: React.js, JavaScript, PHP, Bootstrap, REST APIs, HTML/CSS

AI & Machine Learning: Python, machine learning, data analysis

Data & Backend: Firebase, MySQL, DHIS2, Java, REST API design

Practices & Tooling: Git, GitHub Actions, CI/CD, automated testing, Google Play Console, App Store Connect, Xcode, Android Studio, server management

WORK EXPERIENCE

Mobile Developer (iOS and Android)

Nobuk Africa | May 2022 – Present

- Build and maintain Android and iOS applications for a fintech platform providing loans to small-scale businesses.
- Work across the full mobile stack in Flutter, from feature implementation through release to both app stores.

Mobile Developer (iOS and Android)

Bright Coders Factory East Africa | January 2022 – Present

- Develop Android and iOS applications for a fintech product, working within a distributed team.

CRO / Mobile Developer (iOS and Android)

Cryosoft Corporation | September 2018 – Present

- Lead mobile development across the company's product portfolio, including Liquid, CoolPam, Ride Africa, Soi Pallets, Muvi and Music Family.
- Deliver both customer-facing and staff-facing applications for the same products, covering ordering, fulfilment and reporting.
- Built and published multiple applications to Google Play.

Software Developer

Vihiga County Referral Hospital | January 2021 – August 2021

- Built a Flutter application for tracking diabetes and hypertension patients across Vihiga County under the HealthIT project.
- Enabled clinicians to monitor patient health indicators remotely and prompted patients to record readings and attend appointments.

Software Developer

Kisumu County Ministry of Health | June 2019 – August 2019

- Developed Kisumu Youth, a mobile platform connecting young people with mentors and enabling them to promote their businesses. Published to Google Play.

DHIS2 Applications Developer

HI4Kenya Bootcamp | 2018

- Contributed to Wajibika, a React Native data-collection tool used by the Ministry of Health, storing collected data into DHIS2.

SELECTED PROJECTS

Puzzle Game Portfolio — Wordroot, Solitaire Assured, Sudoku Mentor

Personal project | 2026

- Three Flutter games on a shared engine, with advertising, in-app purchases, localisation and progression implemented once and reused across all three.
- Implemented a Klondike solver proving all 4,023 shipped deals winnable before release, and a sudoku engine grading 5,493 puzzles by the solving technique each requires rather than by clue count.

- Localised to 12 languages, covered by 44 automated tests, and released through a GitHub Actions pipeline deploying to Google Play and TestFlight on merge.

DairyVibes

Published on Google Play

- Dairy farm management application covering milk records, herd, health and feed tracking. Flutter and Firebase.

CoolPam Management

Cryosoft Corporation

- Water management system spanning Android and iOS applications, an admin website in React.js and a desktop administration tool.

Liquid and Liquid Staff

Cryosoft Corporation

- Food-delivery marketplace plus the staff application handling order receipt, processing, delivery and revenue reporting. Flutter, Firebase, PHP and Google Maps.

EDUCATION

BSc, Mathematics and Computer Science

Maseno University | 2016 – 2020

LANGUAGES

English (fluent) | Kiswahili (native)
